

Satwaj Bachhav

Full-Stack Software Engineer | MERN Stack Developer | AI Application Developer
+91 8767356345 | satwajbachhav2004@gmail.com | GitHub | LinkedIn

Professional Summary

Full-Stack Software Engineer specializing in MERN Stack and AI-powered applications. Experienced in building scalable REST APIs, secure authentication, production-ready web applications, and Retrieval-Augmented Generation (RAG) systems using LangChain, LangGraph, and Pinecone. Proficient in integrating multiple LLMs including Gemini, Groq, and Mistral with cloud deployment and modern software engineering practices.

Technical Skills

Languages: JavaScript, TypeScript, C++, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, GSAP, React Router
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0, RBAC, MVC Architecture, Nodemailer
Databases: MongoDB, Mongoose, MongoDB Aggregation Pipeline, Redis, Pinecone
AI / GenAI: LangChain, LangGraph, RAG, AI Agents, Gemini, Groq, Mistral, Tavily Search API
Tools: Git, GitHub, Postman, Railway, Vercel, Render, Cloudinary, Razorpay

Projects

Arena AI | *AI-Powered Search Assistant* Live Demo | GitHub

- *React.js, Node.js, Express.js, MongoDB, LangGraph, LangChain, Pinecone, Gemini, Groq, Mistral, JWT, Tailwind CSS*
- Built a Perplexity-inspired AI assistant using LangGraph workflows and Pinecone-powered Retrieval-Augmented Generation (RAG).
- Integrated Tavily Search API to combine vector retrieval with real-time web search for accurate and up-to-date responses.
- Designed a multi-LLM routing system supporting Gemini, Groq, and Mistral through a unified interface.
- Developed Blinky Arena to compare responses from multiple AI models side-by-side in real time.
- Implemented JWT authentication, persistent chat history, and modular REST APIs for scalable architecture.

Snitch | *MERN E-Commerce Platform* Live Demo | GitHub

- *React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Razorpay, Cloudinary*
- Developed a production-ready MERN e-commerce platform with JWT authentication and Google OAuth 2.0.
- Integrated Razorpay payment gateway with server-side signature verification for secure online transactions.
- Built scalable REST APIs for product management, cart, wishlist, checkout, and order processing.
- Implemented search, filtering, sorting, pagination, and MongoDB Aggregation Pipelines for analytics dashboards.
- Managed global application state using Redux Toolkit and deployed the application on Vercel and Railway.

Open Source & Hackathons

- Contributed 50+ pull requests across SSOC and NSOC open-source programs by fixing bugs, implementing new features, and collaborating with maintainers.
- Built full-stack and AI-powered solutions during hackathons, taking projects from idea to deployment within strict deadlines.
- Experienced with collaborative development workflows including Git branching, pull requests, code reviews, issue tracking, and Agile development practices.

Education

Matoshri College of Engineering and Research Centre, Nashik
Bachelor of Engineering in Information Technology

CGPA: 8.5 / 10
Expected July 2027
